

## CURRICULUM OFFER

As we say in our prospectus, many schools talk about having a ‘broad and balanced curriculum’ but what does that mean at Heart of England? For us it means that students should have every opportunity to build on their learning from primary school and develop further knowledge and understanding of core subjects. It is also a time to discover new interests, skills and talents which they have time to develop and refine. As such we want our curriculum offer to be a *greenhouse* rather than a hot-house so that our students can flourish, feel successful and achieve highly. Our aim for Key Stage 3 is that students become so successful in their learning that they feel confident in their own ability to pursue any of the varied subjects on offer in Key Stage 4 and achieve highly. The table below shows the subjects students will study in KS3 and the relative weighting of each subject.

For more information about the specific curriculum content of each subject please see the [Key stage 3 Overview](#).

Yet more detail about the key assessments for each term, as well as the topics and key skills that your child

will be assessed on are available via the Assessment in the curriculum tab underneath the academic dropdown list.
